Send the Token > Server classmate JWT & Json web Token * To generate the TwT token we actually use the cheut oredentials. Wername → generate JWT → abxc123 * No use of using password to generale IwT as
Jasswood can be fame for two yer logoul-If can only be handled at Foroutend as dener has no knowledge regarding the Joken. for logour at frantend simply clear the Joken. * Same Account on multiple Devices leads to multiple Two Taken Decause of the Finestamp.
